NOMENCLATURE 2012

February 16st 2012 Release

RENAULT SPORT

NOMENCLATURE TECHNICAL REGULATIONS 2012

The technical regulations is based on the following:

Parts for the FORMULA RENAULT 2.0 single-seaters are represented in this nomenclature and split into three categories:

CATEGORY « A »	No modifications are authorised. The parts in this category must remain in their original positions and fulfil the function/s for which they were originally intended. These parts must be genuine FORMULA RENAULT 2.0 parts.
CATEGORY « B »	Parts of the category "A" being the subject of specific prescriptions. Only the modifications or prescriptions indicated in the regulations or in the FORMULA RENAULT 2.0 nomenclature are authorised.
CATEGORY « C »	The parts classed in this category are considered to be unrestricted, on the express condition that the function for which it was originally designed is not deviated from, that it does not fulfil any additional function and that it is located in the same place as the original part. Adapted parts are permitted but must be submitted for approval to the RENAULT SPORT Scrutineers.

The set of items or subassemblies that make up a part or assembly are deemed to belong to the same category as the part or assembly in question.

Scrutineering may consist of comparing the part to be checked against a similar new genuine FORMULA RENAULT 2.0 part.

All parts not shown in the technical regulations are systematically classed in category "A" unless specified otherwise above.

The pictures published in this document only aim at making the nomenclature easier to understand. These pictures cannot be used for any comparison with original vehicle parts.

Some parts from the A and B category present a special mark (hologram, engraving). The presence of this mark guarantees the origin of the part and their use is mandatory. The absence of a mark is a technical non conformity.

An additional marking (engraving or painting) is allowed on all the parts from A and B category.

NOMENCLATURE TECHNICAL REGULATIONS 2012

Nuts, screws, bolts, and uniballs

Nuts, screws, bolts and uniballs are in the category C unless mentioned in the nomenclature.

However, the following must be respected:

- the original diameters,
- the original screw thread,
- the material should be steel of equal or superior quality as that of the original part. The use of other materials (e.g., titanium) is forbidden.

Any type of screw (stud, bolt or standard screws) is allowed, unless mentioned in the nomenclature.

To assure the tightness of the screws, the use of locking wire is permitted,

All the screws that have the function of setting-up an element are in category "A" unless other mention in the nomenclature.

Washers

All washers are in « C » category unless mentioned in the nomenclature and can be removed if required.

It is allowed to add washer only to improve mechanical assemblies.

The use of washer for setting purpose is forbidden, unless specifically mentioned in the nomenclature.

Electrical loom

All the electrical looms belong to category "B" and must be genuine. The loom may be protected by non-retractable sheathes.

Protections

It is allowed to add protection of any kind over the mechanical elements of the car unless specifically mentioned in the nomenclature. These protections must have the sole function of protecting the elements.

For the driver wellness, it is allowed to add protections in the cockpit, these protections must be removed fast without tool.

NOMENCLATURE TECHNICAL REGULATIONS 2012

Supports

It is allowed, unless mentioned in the nomenclature, to add various types of support to improve the fitting of tubes, hoses and electrical looms of the car.

No part modification is allowed to fit these supports.

These supports must have the only function to maintain the elements for which they have been added.

Bodywork

Only in order to manage correct assembly and adjustment of the bodywork part, it is allowed to slightly modify the bodywork parts and their respective supports.

These modifications are submitted to the approved by RENAULT SPORT technical scrutineers.

Adhesive tape may be put on the bodywork but only on fastening elements or other vulnerable leading or trailing edges. In all circumstances, the only purpose of adhesive tape must be to protect the element onto which it has been applied. It must not in any circumstance join various bodywork elements unless special cases mentioned in the nomenclature.

Catch tank

The engine oil and water breather pipes must end into a plastic catch tank of a minimum capacity of 2 liters. This container must be in transparent plastic or must have a transparent panel.

NOMENCLATURE TECHNICAL REGULATIONS 2012

BODYWORK, WINGS, ROLL HOOP, ENGINE EQUIPMENT

Component parts of the bodywork, wings, roll hoop and some engine equipment parts are identified by one or more hologram stickers.

Their presence is mandatory. The person competing is responsible for the condition of the stickers. They must be visible.

All the bodywork parts and the tub can be painted or decorated with adhesive film.

Description of the parts with the location and number of hologram stickers are indicated by arrows.

1B : Engine The engine bears seven (7) seals and one tag :

Five (5) mechanical seals placed:

- on the engine sump
- on the ignition target
- on the oil pump
- on the camshaft blanking caps
- on the fuel ramp

Two (2) microchips placed:

- on the cylinder head, flywheel side.
- on the dry sump

Seals must remain in place. **It is forbidden to carry out any work on the engine**

WARNING : competitors are responsible for the condition of seals.

It is **compulsory** to use the following **engine lubricant: Elf Excellium NF 5W40**

No additive is allowed.

Every engine must be tested on the dyno in order to control its performance and the installation of the 2012 seals. The motorist named by Renault Sport will be responsible for the dyno test. If this article is not respected, it will be considered as a technical non conformity.

It is allowed to shorten the exhaust manifold stud which is the most at the rear of the cylinder head (flywheel side), in order to unmount the exhaust manifold more easily.

3B: Front air box bracket

This bracket is unrestricted.

4B – 5B – 6B : Air box

It is allowed to improve sealing between the different elements composing the airbox.

4B : Air box

It is allowed to use captive nuts to fit the upper part.

6B : Air duct

It is allowed to grind the weld bead situated inside the duct and exclusively this one.

21B : Air temperature sensor

The air temperature sensor must be disconnected from the engine loom. The sensor and its specific mounting & loom can be removed from the car. In this case, the hole made for the sensor into the lower part of the airbox can be closed with tape.

22B: Air pressure sensor

It is allowed to improve the sensor fitting.

27B : Capteur de pression d'huile

2 types of oil pressure sensors are allowed :
- ref. : 7711 166 756
- ref. : 7711 166 027

30B : Camshaft solenoid valve

3 types of camshaft solenoid valve are allowed :
- ref. 7711 166 735
- ref. 7711 162 635
- ref. 7711 166 754

35B : Camshaft sensor

2 types of camshaft sensors are allowed :
- ref. : 7711 166 753
- ref. : 7711 160 902

1B : Water radiator

It is allowed to:

- improve sealing between radiators and their support.
- improve their fitting.

2B – 6B – 9B – 12B – 13B : Water pipes

It is allowed to fit a wrap/sheathing protection on the pipes.

18B – 25B : Rubber hoses

The rubber hoses are free but the internal diameter of the replacement hoses cannot be smaller than the diameter of the original ones.

1B : Fuel tank

2 types of fuel tank are allowed :

- Ref. : 7711 166 002
- Ref. : 7711 166 665

8B : Washer

This washer is not mandatory.

9B : Fuel filter

Only the Renault Sport fuel filter ref. 77 11 161 845 is allowed.

12B : Fuel pump

2 types of fuel pumps are allowed :

- Ref. : 7711 166 727
- Ref. : 7711 154 287

It is allowed to fit a system preventing the connectors of the fuel pump loom from getting loose.

13 B: Spacer

It's allowed to remove this spacer.

20B : Fuel pressure sensor

Deux types of fuel pressure sensor are allowed :

- Ref. : 7711 158 514
- Ref. : 7711 166 755

1B - 2B - 4B - 5B - 7B : Exhaust elements

It is allowed to repair the exhaust elements respecting the original dimensions and functions.
Adding reinforcement is forbidden
Part assembly systems can be replaced by bolts.

1B : Exhaust manifold

It is allowed:

- to use heat wrap on the exhaust manifold.
- to add any type of paint on the outer surface

2B : Catalytic converter

3 types of catalytic converters are allowed :

- Ref. 7711 166 121
- Ref. 0711 166 121
- Ref. 7711 166 721

For the catalytic converter ref. 7711 166 121 and 0711 166 121, It is mandatory to use the silencer ref. 7711 166 124.

For the catalytic converter ref. 7711 166 721, , It is mandatory to use the silencer ref. FR 1112/10 (HJS System).

3B : Exhaust clamp

The length of the screw of the clamp is free

5B : Silencer

2 types of silencer are allowed :

- ref. 7711 166 124

- ref. **FR 1112/10 (HJS System)**

For the silencer ref. : 7711 166 124, it is mandatory to use the catalytic converter ref. 7711 166 121 or 0711 166 121.

To replace the internal of the silencer ref. 7711 166 124, it is mandatory to use the kit Ref. 0011 166 124

For the silencer ref. : **FR 1112/10 (HJS System)**, it is mandatory to use the catalytic converter ref. 7711 166 721.

15B : Exhaust thermal shield

It is allowed to reinforce/repair the exhaust thermal shield ref. 7711 166 119 around its mounting holes respecting the original dimensions and functions.

3B : Right hand side frame

It is allowed to had a heat protection (heat wrap type).

12B : Shim

Two types of shims can be used to set-up the frames position:
 - reference 77 11 166 159 : 0,5 mm thickness
 - reference 77 11 166 160 : 1 mm thickness
 They can be placed behind all the fitting points of the frames.

8B - 9B : Clutch hose

It is allowed to add a quick coupling device on the clutch line.

5B - 6B : Clutch

Only the Renault Sport clutch mechanism ref. 77 11 166 679 and the clutch releaser ref. 77 11 166 678 are allowed.

11B - 13B - 14B : Clutch pressure sensor

It's allowed to install a clutch pressure sensor.
Only Renault Sport sensor ref. 77 11 166 109 and banjo screw ref. 7711 166 139 are allowed.

8B : « Belleville » race

3 types of « Belleville » race are allowed:

- ref : 0191 030 742 4,2 mm thickness
- ref : 0191 030 743 4,3 mm thickness
- ref : 0191 030 744 4,4 mm thickness

9B : Friction discs

Ruled thickness : 1,75 mm +0.02/-0.10

10B : Core discs

Rules thickness : 1.75 mm +0.02/-0.06

12B : Differential ramps

It is allowed to swap the directions of the differential ramps

Mandatory preload setting:

The Genuine stack must be respected. It must not exceed a maximum preload of 2,5 + 0,5 DaN/m and no play is allowed between the stack cover plate (6) and the circlip (5).

The non respect of the stack order or of the preload value will be considered as a non conformity.

Differential preload will be measured with differential out of the gearbox.

1B : Chassis

Any repair to the chassis must be accompanied by a written declaration by the entrant to the Renault Sport Technical scrutineers. It must also be mentioned in the vehicle's technical passport. Important repair will have to be exclusively carried out by the chassis manufacturer.

It is allowed to repair threads in case of metal tearing.

It is allowed to stick a thermal protection of adhesive metallic tape on the back face of the tub, in front of the engine.

It is allowed to bond pads on top of the front part of the chassis in order to set up the car.

It is allowed to fit ballast in the chassis below the driver's legs (5kg maximum) following the procedure described in the User Manual (chapter A)

The additional ballast can be used only if the original location (behind battery) is already full (minimum 12kg).

Material and shape are free.

This additional ballast must be fitted using BHS screws.

5B : Upper crashbox bracket

It is allowed to enlarge the hole to improve crashbox fitting.

6B : Lower crashbox bracket

It is allowed to repair the threaded hole of this bracket.

1B : Crashbox tip

It is forbidden to repair the crashbox tip. It can be replaced following the procedure that can be found in the 2012 User Manual.

2B : Nose or crashbox

Any repair to the crashbox must be accompanied by a written declaration by the entrant to the Renault Sport Technical scrutineers. It must also be mentioned in the vehicle's technical passport. Important repair will have to be exclusively carried out by the chassis manufacturer.

It is allowed to repair threads in case of metal tearing.

3B- 4B - 6B :

It is allowed to repair without any change of weight or dimension.

3B : Front cover

It is allowed:

- To add adhesive tape on the camlocs. This tape must only secure the cover fitting and cannot bind two elements together.

- To drill holes in the cover for the radio antenna and/or the pitot tube. In case of use of a Pitot sensor during qualifying and race, only the Renault Sport ref. 7711 166 400 is allowed.

5B : Head rest

The installation of a sealing gasket between the head rest and the body is permitted.

The installation of additional protection and on the head rest is permitted.

It must be fixed obligatorily with a « Velcro-type» fixation, so that it can be removed rapidly and easily.

It is allowed to add fire-proof covering.

It is allowed to paint it.

8B : Extractable seat shell and seat

It is permitted to add a seat.

The loops of the belts used to extract the seat from the car must be positioned so as to facilitate the eventual intervention of the first aid personnel.

It is allowed to trim the front section of the extractable seat in order to avoid contact with the carbon bulkhead.

It is allowed to repair the extractable seat shell without any change of weight or dimension.

It is allowed to fix a washer or a spacer on the carbon seat in order to improve its support with the chassis pins. This modification must not affect the extraction in case of emergency.

It is allowed to add a seat in accordance with the 2012 User Manual (chapter B). The maximum weight of this seat is seven (7) Kilograms

1B : Front wood

It is permitted to apply adhesive tape on the leading edges. In all cases, its only function shall be to protect the item to which it has been applied. Under no circumstances shall it be used to connect several items.
It can be painted

2B - 3B : Intermediate and rear wood

They can be painted

2B : Intermediate wood

The minimum thickness is 3 mm.

The thickness measurement will be made around the 4 holes situated close to the longitudinal axle of the wood (marked with a *).

It is allowed to drill the wood in order to be able to unmount the battery rack and the rear extinguisher support without removing the wood.

4B - 5B : Floors

It is allowed to repair with no change in weight and dimension.

It is allowed to drill the floors in order to be able to unmount the battery rack and the rear extinguisher support without removing the wood.

Floors can be fitted with captive nuts.

17B - 19B : Floor stays

It is allowed to add washers between the stay and the floor and to enlarge holes to respect the mandatory position of the floor, as described in the 2012 User Manual.

1B - 2B - 3B - 4B - 7B : Bodywork

It is allowed to repair without change of weight or dimension.

1B-2B-7B : Sidepods and engine cover

It is allowed too add adhesive tape on the camlocs and zeus. This tape must only secure the fitting and cannot bind two elements together..

The genuine fitting system can be replaced by a system screw + nuts.

1B-2B : Sidepods

it is allowed to add a protective and sealing gasket between the sidepods and the chassis.

It is allowed to add an adhesive heat protection under the right hand sidepod (2).

It is allowed to trim the upper part of the left hand sidepod to avoid any potential contact with the "Staübli" connector of the engine.

It is allowed to trim the left hand sidepod in order to fit the transponder following the procedure described in the 2012 User Manual (chapter E).

3B-4B : Radiator ducts

It is allowed to add gaskets or adhesive tape between the ducts and the chassis to improve sealing.

5B - 6B : Radiator nets

A screen or tape can be placed on the nets to regulate engine temperature. It is allowed to link the radiator nets and the ducts with tape.

It is allowed to repair the radiator nets respecting the original dimensions and functions of the complete part.

Reinforcements are not allowed.

1B : Ballast support

It is mandatory to mount one support below and one support above the ballast.
Its thickness is free but the original external dimensions must be respected.

2B : Ballast

2 types of ballast are allowed

- 1kg ref. 77 11 166 589
- 2.5kg ref. 77 11 166 743

It is allowed to add tape all around each ballast plate.

The number of ballast is free in order to respect the articles 4.1 & 4.2 of the 2012 Formula Renault 2.0 Technical regulations.

To improve the fitting of the ballast, it is allowed to put spacers or nuts between the ballast and the chassis.

3B : Spacer

The original spacers can be modified or removed.

4B : Ballast screws

2 types of screws are allowed:

- M10 short ref. 7711 166 741
- M10 long ref. 0011 166 741

To respect the article 4.3 of the 2012 Formula Renault 2.0 Technical regulations, the screws should permit to add a seal if the Renault Sport technical scrutineers judge it necessary.
